DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a composition of high density lipoprotein.

Group II, claim(s) 6. drawn to a method of treatment of organ dysfunction.

The inventions listed as groups I-II do not relate to a single general inventive concept under PCT rule 13.1 because, under PCT rule 13.2, they lack the same or corresponding technical features for the following reasons: the composition of group I lacks novelty (i.e., it is anticipated by prior art reference)- see, e.g., USPN 5,780,592. Thus, the special technical feature which links the claims does not provide a contribution over the prior art (with respect to group II) so unity of invention is lacking.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is 571-272-0971. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
